

WATERTIGHT HATCH

Hatch manufactured from 8mm thick cover plate suitably stiffened with weld on ribs and fitted with a 40x25mm EPDM section perimeter seal. Hatch secured by linking of four points and operated by stainless steel central handwheel fitted both sides. This can also be supplied as a flush deck hatch with T key operation from above if required. The hatch is supplied with two hinge point with spring assist operation. Suitable for welding direct to structure. Standard finish for this product is SA2.5 and red oxide primer.
