H60-H120 Blast Rated Window

Constructed of two glazing units, each consist of 27mm H120 glass and 23mm Pyrostop glass manufactured by Pilkington UK Ltd., spaced 12mm apart by an air gap. The glazing units are separated by an air space of 60mm and mounted in an inner and outer steel frame and with a retaining section in the middle. The steel frames and sections are insulated and fitted to each other with bolts and the inner steel section is welded to the bulkhead.
